

# Integrated Security & Threat Management Appliances

## INTEGRATED SECURITY & THREAT MANAGEMENT APPLIANCE

eEye offers a full line of integrated security and threat management appliances dedicated to vulnerability management, endpoint protection, and compliance management. These appliances provide multi-platform network discovery, automated vulnerability and risk assessment, centralized policy enforcement, and powerful compliance and regulatory audit capabilities.

### EEYE UVM20

The eEye UVM20 Security Management Appliance delivers pre-installed and pre-configured security and vulnerability management capabilities for eEye's Retina Network Security Scanner, Blink Enterprise and Blink Professional Client Security agents using the integrated Retina CS Management Console. This single-unit rack-mount appliance reduces the time to implement integrated vulnerability, security, and incident management capabilities for the entire enterprise.

### RETINA 651

The Retina Security Management Appliance 651 is designed to facilitate setup and provide complete coverage for vulnerability assessment and network protection for any size network environment. The Retina Appliance 651 is ideal for both small and medium-size organizations desiring a standalone vulnerability scanner and for larger organizations looking to design a vulnerability management solution that links regional office locations. The solution combines eEye's Retina Network Security Scanner, Iris Network Traffic Analyzer and Blink Professional Host-based Intrusion Prevention solution into a single appliance.

### BLINK 200

Small and medium-sized businesses looking to protect their personal computers from the latest viruses and security threats need not look any further than the Blink Security Management Appliance 200. The Blink Security Management Appliance 200 from eEye Digital Security is the first and only appliance in the industry to allow businesses to manage desktop security agents in a complete, ready to deploy, appliance form factor. The Blink Security Management Appliance 200 provides complete management and reporting of these agents for all regulatory compliance initiatives, security enforcement needs and peace of mind for business continuity.

## BENEFITS

**RAPID DEPLOYMENT:** APPLIANCE CAN be deployed and scanning in 15 minutes

**ALL-IN-ONE SECURITY MANAGEMENT:** Everything you need for centralized vulnerability and endpoint management comes pre-installed, pre-configured, pre-tuned, and pre-licensed in the appliance

**LOWER TOTAL COST OF OWNERSHIP** by combining disparate security practices into a cohesive policy, threat and vulnerability management framework

**PINPOINTS NETWORK VULNERABILITIES,** operating system vulnerabilities, application vulnerabilities, improper configurations, and published zero-day threats

**DISCOVERY AND PATCH ASSESSMENT** rapidly discover and assess all network devices, operating systems, applications, patch levels, and policy configurations
