

eEye Solutions Overview

UNIFIED VULNERABILITY MANAGEMENT

Know Your Vulnerabilities. Know You're Protected.

BENEFITS

Simplified vulnerability management to reduce overall security risk

Greater efficiency through centralized controls and reporting

Reduced cost of security and compliance

Increased security across all IT assets, remote and local

Scalable, flexible solutions for organizations of any size and across industries

More effective mitigation and protection

The cost and consequences of maintaining security and compliance are steeper than ever. With new attack vectors being exploited through desktop applications, employee-owned devices, mobile computing, and social networks, protecting corporate assets can seem overwhelming. Plus, with new technical standards and compliance regulations, the urgency to secure and manage every aspect of the IT infrastructure increases even further.

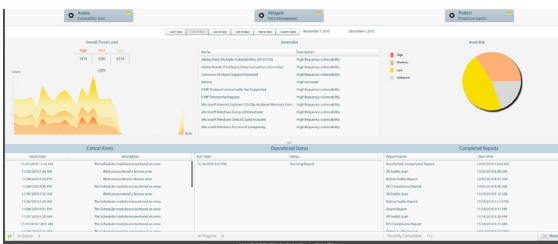

Plus, with new technical standards and compliance regulations, the urgency to secure and manage every aspect of the IT infrastructure increases even further. You need safeguards to protect everything from servers, databases, and web applications to laptops, printers, and networking devices.

SIMPLER, MORE EFFECTIVE VULNERABILITY MANAGEMENT

eEye makes vulnerability and compliance management easier with award-winning solutions scalable enough to support organizations of any size and flexible enough to suit the specific requirements of any industry.

Having developed one of the first vulnerability scanners on the market, we've built on that foundation for more than a decade to provide full vulnerability lifecycle management in a single solution – Retina Unified Vulnerability Management. The only technology of its kind, Retina enables you to secure your entire environment, centrally finding, fixing, protecting, and reporting from one console.

To complement the Retina solution, eEye offers a complete set of optional add-on modules for configuration compliance, regulatory reporting, and integrated patch management. eEye also provides security products for endpoint protection, Web server security, and network traffic analysis.

Retina CS - Vulnerability by Asset

EEYE SOLUTION SUITE

Retina CS Management Console

Retina CS Management Console: Retina CS enables IT Security professionals to centrally manage organization-wide IT security from a single, web-based console. It's the only unified vulnerability and compliance management solution that integrates assessment, mitigation, protection, and reporting into a complete offering.

- **Retina Insight:** Get actionable reporting, analytics, and trending across the vulnerability lifecycle via this powerful reporting engine, included with Retina CS at no additional cost.
- **Configuration Compliance: A Retina CS Add-on Module:** Simplify how you audit and report on common industry configuration guidelines and best practices.
- **Regulatory Reporting: A Retina CS Add-on Module:** Choose from Regulatory Reporting packs to automate how you navigate through the increasingly complex regulatory landscape.
- **Patch Management: A Retina CS Add-on Module:** Close the loop on vulnerabilities by providing integrated, automated, agent-less patching from a single console.

Retina Network Security Scanner

Identify known and zero-day vulnerabilities using the industry's most mature and effective vulnerability scanning technology.

Retina.GOV

Rely on integrated end-to-end vulnerability and compliance management designed specifically for Government departments and agencies.

Retina Web Security Scanner

Rapidly and accurately scan large, complex websites and web applications to assess web-based vulnerabilities.

ADDITIONAL SECURITY PRODUCTS

Blink Endpoint Protection

Augment existing security products with integrated multi-layered endpoint protection in a single, lightweight client.

Iris Network Traffic Analyzer

See analysis and integrated forensics reporting on network security traffic.

SecureIIS Web Server Security

Ensure protection for Windows IIS Servers by preventing known exploits, zero day attacks, and other harmful web server traffic.

ABOUT EEYE

SINCE 1998, EEYE DIGITAL SECURITY HAS MADE VULNERABILITY AND COMPLIANCE MANAGEMENT SIMPLER AND MORE EFFICIENT BY PROVIDING THE ONLY UNIFIED SOLUTION THAT INTEGRATES ASSESSMENT, MITIGATION, PROTECTION, AND REPORTING INTO A COMPLETE OFFERING WITH OPTIONAL ADD-ON MODULES FOR CONFIGURATION COMPLIANCE, REGULATORY REPORTING, AND INTEGRATED PATCH MANAGEMENT. EEYE'S WORLD-RENOWNED RESEARCH AND DEVELOPMENT TEAM IS CONSISTENTLY THE FIRST TO UNCOVER CRITICAL VULNERABILITIES, PREVENT THEIR EXPLOIT, AND BUILD NEW PROTECTIONS INTO OUR SOLUTIONS. THOUSANDS OF MID-TO-LARGE-SIZE PRIVATE-SECTOR AND GOVERNMENT ORGANIZATIONS, INCLUDING THE TWO LARGEST VULNERABILITY MANAGEMENT INSTALLATIONS IN THE WORLD, RELY ON EEYE TO PROTECT AGAINST THE LATEST KNOWN AND ZERO-DAY VULNERABILITIES.
